

People have been trying to
create a perfect society
since the
dawn of
time.

Each time it has
failed for one
important reason:
The principles of
good government were
never applied in full.

The best purpose of Government is to:

1. Manage scarce resources
2. Cultivate human potential
3. Negotiate with other sovereign countries

Principles:

1. All political power comes from the people and to the people it must sooner or later return.
2. 'Accountable government' can only be achieved when the individual, not the group, is assigned the accountability and responsibility of performing tasks.
3. Only when every citizen actively participates in community can true freedom be achieved.
4. It is the duty of every citizen to question authority when they think that those in authority are wrong.
5. Beware the barbarians howling at your gate.
Share with them the bounty the bounty of the land or be destroyed by them.
6. Law of Freedom
7. Law of Balance
8. Law of Reason
9. Correct your mistakes, welcome ~~critism~~ criticism,

Aipotu - The land of personal power
